

# Paul G Adam

## FULL STACK WEB DEVELOPER

### SKILLS

HTML5, CSS3, Javascript, SQL, C# TypeScript, Python,  
React, React Native, Bootstrap 4, 5  
SQL (PostgreSQL, T-SQL) MongoDB  
Google Cloud Services, AWS, Azure  
DevOps, Software Testing, Test-writing  
Agile, Scrum, Kan-Ban, team solutions  
Entity Relational modeling

### EXPERIENCE

#### RESOURCE DATA INC

Anchorage, Boise, Houston, Juneau

August 2011-Spring 2016

Drove the Bosie Branch's testing, test-writing effort on client and internal projects.

Created a new opportunity for myself, and RDI, at a local energy client's GIS department, by taking an administrative role and expanding it to a full GIS analyst role to better serve the client's needs.

Promoted to test manager on a local client's grocery MVVM project after creating written test solutions and managing a testing regression base for an agile team.

Helped build Boise's VMWare server farm.

Desktop support for development teams

#### EBAY STORE

Online

January 2003 to Spring 2016

Created, maintained, and supported templates and sales pages for my online eBay sales business using HTML, CSS; learning these skills from scratch, as a need to increase my sales marketing.
